SUMMARY

Experienced professional with a background in business management and engineering, poised to contribute valuable expertise to your esteemed organization. Skilled in customer handling, communication, and market navigation, with a proven track record of driving operational efficiency and enhancing client satisfaction.

PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER, DBRS Morningstar Inc

Mumbai | May 2022 – Dec 2023

- Collaborated seamlessly with cross-functional teams to boost application performance, resulting in a 15% improvement in user experience and a 20% increase in operational efficiency.
- Revitalized Morningstar design systems, yielding a 20% enhancement in efficiency and consistency throughout the product development process.
- Employed agile methodologies and best practices, resulting in streamlined management and a 15% reduction in delivery time for high-quality software solutions.
- Remained current with industry trends and emerging technologies, proposing and executing inventive solutions—improved application efficiency by integrating Nexus and VUE frameworks.
- Managed UI operations to ensure high-quality designs met project requirements. Migrated applications to an independent server.
- Achieved 85% test coverage using JEST and JASMINE in Sonar Cube for CLO application and EU ir-stress Tool.

PRODUCT ENGINEER, Intellect Design Arena

Mumbai | Oct 2018 – May 2022

- Orchestrated the migration of core CIBC banking applications to independent servers, reducing operational dependencies by 11% and enhancing scalability and reliability.
- Spearheaded the integration of ARX 20 with Angular 10 microservices, resulting in a 35% increase in application responsiveness and optimization of system performance.
- Implemented comprehensive accessibility features, achieving a 30% enhancement in inclusivity within the application ecosystem to cater to physically impaired users.
- Purged and modernized a new utility for client data conservation by 60%, utilizing Spring Boot and Postgres SQL for efficient data management.
- Proactively designed and deployed monitoring tools for Bank production services, ensuring smooth operations and maintenance of AMWS while adhering to agile methodologies using JIRA for change management.
